## Best Post-Treatment Serum

"After a recent Matrix Pro microneedling treatment, a procedure that strategically injures skin so it can come back plumper and smoother, the dermatologist handed me a blue bottle and said, 'Put on this and only this,'" says Sandoval Box. "My pinkness vanished within hours, and my glow lasted weeks." In addition to peptides, antioxidants, and hydrators, the serum contains lapachol, a tree extract that helps along the skin-repair process. P.S. It's excellent for sunburns, too.
